For their Kat-5 triumph, Nagel and his four “Team Gray” colleagues were named to *Gambit* newspaper’s 2008 “40 Under 40” honor roll, which recognizes the accomplishments of individuals who are 39 years old and younger in New Orleans.

A former engineer for Kongsberg Maritime and Intralox, Nagel also holds several patents on innovations ranging from autonomous vehicle systems (AVS) to conveyor belts.

And his inventions aren’t limited to machines. As founder of Rehydration Solutions LLC, Nagel developed Lyte Stix, an all-natural electrolyte freezer bar for athletes — likely inspired by his own experience as a top-500 finisher in the Crescent City Classic 10K.

Among his activities at the School of Medicine, Nagel is serving as the 2018 president of the Medical Entrepreneurship Interest Group at the medical school.

Nagel says he is honored by the LAMMICO award and is happy to be at the Tulane School of Medicine.

“It was my first choice.”
