In Morehead City, the rain and surf pounded the shoreline and took aim at the few boats still in the water. In New Bern, on the Neuse River, a CNN correspondent had to keep shifting position in a park as the water kept rising. Still to come are the hurricane-force winds that cover more than 15,000 square miles -- larger than the states of Massachusetts, Connecticut and Rhode Island combined. The area covered by hurricane-force winds recently doubled -- meaning far more people will get blasted with winds topping 73 mph.
