Art-o-facts

November 29, 2017 12:30 PM Paula Burch-Celentano pburch@tulane.edu

Tulane second-year students Helen Weierbach, center, and Sian Grosskopf, right, discuss *Landen Density*, artwork by Katherine Strasser and Victor Moll, left, professor of mathematics, at the opening of the 2017 Computational Art Show. Sponsored by the <u>Center for Computational Science</u>, the annual exhibit features computergenerated works that illustrate current research across the fields of biomathematics, physics, epidemiology, biology, physiology and engineering. Produced by the center's students, researchers and faculty, the artwork is on display throughout the year on the fourth floor of Stanley Thomas Hall.
