Tulane's School of Professional Advancement's Digital Design program is offering a free, weekly program called the Design Lagniappe Series, beginning April 1. Tulane's School of Professional Advancement's Digital Design program is offering a free, weekly program called the Design Lagniappe Series, beginning April 1.

Tulane University's School of Professional Advancement's award-winning digital design program will offer a free, weekly online event in design education called the Design Lagniappe Series, beginning April 1.

Participants will learn design tips and tricks, Adobe Illustrator and Photoshop basics, interactive techniques using Adobe XD, how to use type to elevate messaging and iPad ProCreate basics, among others during the one-hour sessions.

"Our events at Tulane SoPA Digital Design are created to engage and inform," said Amanda Garcia, professor and director of SoPA's digital design program. "Not only do we bring the best and brightest from creative industries direct to our students and community, but we also host educational experiences. Our Design Lagniappe Series is one way we are bringing design education to our community at large while providing tangible skills to those seeking a new career or enthusiast avenues during this uncertain time.

"Participants can expect to learn the basics of Adobe software such as XD, Photoshop and Illustrator along with design concepts and typography techniques. Our expert faculty and award-winning alumni will lead the training so that we may highlight our leaders that make our program truly exceptional."
