Campus Services is in the process of leveling the Berger Family Lawn and Monroe Quad and then will begin laying sod.

From now through the beginning of August, members of the Tulane community are asked to walk around the new areas of sod and not on it. The sod needs about 14 days to acclimate once it has been laid. Signage will indicate where the new grass is

growing and where you can walk.

The quads are being refurbished after the deconstruction of temporary structures earlier this summer.
