A visitor to the Royal D. Suttkus Fish Collection, housed within the Tulane University Biodiversity Research Institute, examines a specimen during a workshop hosted by [A Studio in the Woods](#), “[Fishes: Masters of Adaptation - Workshop and Tour of the Royal D. Suttkus Fish Collection](#).” The workshop was part of a collaborative project, “[Searching for the Ghosts of the Gulf](#),” with artist and biologist [Brandon Ballengée](#), A Studio in the Woods and the Plaquemines Parish government. The collection is the largest of its type in the world. Over 7 million specimens have been recorded at the site with the majority of the collection being from freshwater river basins in the Gulf-

South region.
