Tulane's annual Employee Resource Fair provided faculty and staff with plenty of information on benefits, perks and opportunities for professional development available to them as Tulane employees.

In September, Tulane's annual Employee Resource Fair drew more than 400 employees eager to discover the wide variety of benefits available to Tulane faculty and staff. From professional development tools to wellness programs, participants left with valuable information from dozens of vendors to support their work and well-being at Tulane.

Hands-on activities and demonstrations drew steady interest from employees. At the Talent Development table, Javier Pineda highlighted the power of artificial

intelligence within [LinkedIn Learning](#). Greg Clouatre from [Tulane Telehealth](#) demonstrated practical ways to use virtual care through a fun, interactive dice game. [Technology Connection](#)'s Gary Dauphine drew a crowd with his popular prize wheel, while [WaveWorks!](#) [showcased upcoming changes](#) through engaging displays and live TV demos.
